Digitisation Services to Capture Your Archive Collections

Max has been in the business of digitisation for over 25 years. Our reputation for the safe handling of materials and pin sharp images means we can count world-leading museums, libraries and galleries among our clients.

Max's services can be provided at our studios in London, Edinburgh and Nevada (USA), or at the clients' facility should the movement of collections present a risk. Max constantly invests in the latest camera and lighting solutions and has developed novel capture stations and archive informatics systems for project management, metadata capture and digital preservation.

Why choose Max?

- **Image Capture** – Our project technicians expertly handle and capture initial samples for internal review and sign off, ensuring the highest quality from the start.
- **Metadata Harvesting** – We provide a rich AI-assisted multi-user data capture service, including hand-written documents, that unlocks critical research insights.
- **Management information** – We record capture counts, notes, queries, feedback, sign offs, and actions for comprehensive management reporting.
- **Colour Fidelity** – Our imaging standards compliance ensures every image authentically represents the original.
- **Quality Assurance** – Every image undergoes multiple inspections before being released.
- **Cataloguing** – We meet all international collection standards to ensure accurate cataloguing of your collection.

Benefit from Max's experience and state-of-the-art technology to achieve unparalleled digitisation outcomes

About Max

Max is a UK-based company with an international presence, which has been providing innovative digitisation services to world-leading institutions for over 25 years.

Why digitise your collection?

- **Long-Term Preservation:** Safeguard your records for future generations
- **Global Access:** Enable remote access to your collection from anywhere in the world
- **Broaden Reach:** Engage a wider audience of researchers worldwide
- **Enhanced Insights:** Gain new insights through precise metadata collection
- **Advanced Integration:** Integrate archives with AI and other technologies for deeper analysis
- **Unified Collections:** Aggregate dispersed collections into a single, accessible location

The benefits of using Max

- Over 25 years of delivering high throughput and ultra-high resolution images
- Precise metadata harvesting including handwritten records and georeferencing
- Adherence to leading technology and operational standards
- Cutting-edge project management, archive management, and digital preservation solutions

"Max have been a trusted digitisation and solutions partner with King's College London Archives for more than a decade. They have always undertaken work to a high standard, and on time, and are a friendly team who are ready to help at short notice".

Dr Geoff Browell, Head of Archives and Research Collections
King's College, London.

Case Study: Imperial College

Max's collaboration with Imperial College London encompasses digitisation and the provision of our cutting-edge archive management and digital preservation services. These services, tailored to meet the unique needs of the Imperial College archive, ensure the seamless management and long-term preservation of digital assets, safeguarding the university's rich intellectual heritage for generations.

Furthermore, our partnership extends beyond digitisation, as we collaborate with various departments across the university, leveraging our expertise to support diverse academic endeavours. By bridging the gap between archival preservation and academic research, we contribute to the university's mission of advancing knowledge and fostering innovation in the fields of science, engineering, medicine, and business.
